

Predicting Internet Addiction from Social Variables Among high Basic Stage Students

درجة التنبؤ بالإدمان على الانترنت في ضوء بعض المتغيرات الاجتماعية لدى طلبة المرحلة الأساسية العليا

إعداد

لين حكم وصفي الحطاب

ماجستير علم نفس تربوي، الجامعة الهاشمية، 2010م

قدمت هذه الأطروحة استكمالا لمتطلبات الحصول على درجة دكتوراه الفلسفة في تخصص علم النفس التربوي في جامعة اليرموك، اربد، الأردن

أعضاء لجنة المناقشة

أ.د عدنان يوسف العتوم .... رئيساً ومشرفاً

أستاذ في علم النفس التربوي، جامعة اليرموك

أ.د رافع عقيل الزغول........................... عضواً

أستاذ في علم النفس التربوي، جامعة اليرموك

أ.د محمد أحمد الصوالحة........................... عضواً

أستاذ في علم النفس التربوي، جامعة اليرموك

د. عبد الناصر ذياب الجراح........................... عضواً

أستاذ مشارك في علم النفس التربوي، جامعة اليرموك

د. عبد اللطيف عبد الكريم المومني........................... عضواً

أستاذ مشارك في علم النفس التربوي، جامعة البلقاء التطبيقية

الإهداء

إلى ملاكي في الحياة .. إلى معنى الحب والحنان والتفاني ..

إلى بسمة الحياة وسر الوجود

إلى من أعطاني ولم يزل يعطي بلا حدود

إلى من كان دعائها سر نجاحي

أمي الغالية أطال الله في عمرها

****

لمن أشعل لي أحلى شموع عمره.. لشمعة مضيئة في طريقي..

لمن احتوى جميع مراحل حياتي بحكمة وعقل

إلى من أرفع رأسي عالياً افتخاراً به

والداي الغالي أطال الله في عمره

الباحثة

Abstract

Alhattab, Leen Hakam. Predicting Internet Addiction from Social Variables Among high Basic Stage Students. 2013. (Supervisor: Prof. Adnan Yusif Al-atoum).

This study aimed at identifying the level of Internet addiction among the students of high Basic Stage (8th, 9th and tenth grades) in Zarqa first Directorate public education schools. And whether the level of psychosocial adaption, and social support different due to internet addiction. As well as knowing whether psychosocial adaption, social support, sex, grade, father's educational, mother's educational level, father's career, mother's career, economic level, number of family members, number of hours spent on the Internet daily and number of years using the Internet variables, As well as any knowledge of activities practiced by the students on the Internet such as: check e-mail, social networking sites (Face book, Twitter, Fiber ...), games, search for information, listen and download songs and movies) can also predict of Internet addiction. To achieve the objectives of the study, three tools were used, the first to measure the degree of addiction on the Internet developed by the researcher after taking advantage of the theoretical literature and previous studies on the subject. The second tool was to measure psychosocial adaption, where the researcher has translated and localized Achenbach measure of psychosocial adaption. The third tool was to measure social support for high Basic Stage students, developed by the researcher. All study tools had an adequate reliability and validity.

The study sample consisted of (600) male & female students from graders (8th, 9th and tenth grades) in the public schools in the Governorate of Zarqa for the academic year 2011/2012 spread over 18 schools were selected randomly.

The results of the study revealed that the percentage of Internet addicts amounted to 8.5% of the total study.

The results of the study showed that psychosocial adaption, number of hours spent by the individual on the Internet, sex, social support, mother's career, search for information, social networking sites (Facebook, Twitter Fiber,..), educational level of the father, and finally the mother's educational level respectively were the variables that can be predicted the phenomenon of Internet addiction.

The results of the study also showed statistically significant differences in social support due Internet addiction variable in favor non-addicts. The results also showed that there were statistically significant differences in psychosocial adaption due Internet addiction variable in favor non-addicts.

Key words: Internet addiction, psychosocial adaption, social support
